

# Emission Control

30<sup>th</sup> June - 1<sup>st</sup> July 2010  
London, UK

## Mitigating Maritime Pollution

ACI's inaugural **Emission Control Summit** taking place on **Wed 30th June & Thu 1st July 2010 in Central London** will focus on all technical and operational aspects of pollution reduction from shipping, providing ship owners and managers with real solutions on how to make their fleet environmentally-friendly, as well as giving a platform for discussion on future of carbon trading in the industry. This conference will focus on how senior executives can meet their business goals to increase competitiveness and profitability by utilising new corporate social responsibility strategies on technical and operational level.

### The Key Topics Include

- Discover how to improve your emission control systems
- Reduce fuel costs by achieving operational efficiency
- Understand how efficient design can reduce shipping's environmental impact
- Consider alternative fuels, what is on the market and what is coming
- Utilise developments in market-based instruments and carbon trading of other industries
- Discuss and develop the best long term solutions with industry experts
